Geography Key Knowledge – Spring Term
Why do people choose to live in dangerous places?

Key Places and Dates	Key People										
<div style="display: flex; justify-content: space-around;">   </div> <p>Naples, Italy San Francisco, USA</p> <p>79 AD - Mount Vesuvius erupted covering Pompeii 1989 (17th Oct) - San Francisco earthquake 2018 (17th Aug) - Mount Kilauea erupted on Hawaii</p>	<p>Charles F Richter</p>  <p>He developed the Richter scale for measuring earthquake magnitude</p>										
Key Facts	Vocabulary										
<ul style="list-style-type: none"> A volcano is an opening in the Earth's crust that allows magma, hot ash and gases to escape. Earthquakes happen when two large pieces of the Earth's crust suddenly slip, causing shockwaves to shake the surface of the earth. Most volcanic eruptions occur around the Ring of Fire around the Pacific Ocean. People choose to live near volcanoes for several reasons including: rich and fertile soil, economic activity from tourism and geothermal energy production. 	<table border="1"> <tr> <td>Adversity</td><td>trouble or difficulty.</td></tr> <tr> <td>Magma</td><td>hot, liquid matter beneath the earth's surface that cools to form igneous rock.</td></tr> <tr> <td>Lava</td><td>hot, melted rock that erupts from a volcano.</td></tr> <tr> <td>Ring of Fire</td><td>Is a volcanic chain surrounding the Pacific Ocean.</td></tr> <tr> <td>Seismic waves</td><td>waves of energy that travel through the Earth's layers, and are a result of earthquakes and volcanic eruptions.</td></tr> </table>	Adversity	trouble or difficulty.	Magma	hot, liquid matter beneath the earth's surface that cools to form igneous rock.	Lava	hot, melted rock that erupts from a volcano.	Ring of Fire	Is a volcanic chain surrounding the Pacific Ocean.	Seismic waves	waves of energy that travel through the Earth's layers, and are a result of earthquakes and volcanic eruptions.
Adversity	trouble or difficulty.										
Magma	hot, liquid matter beneath the earth's surface that cools to form igneous rock.										
Lava	hot, melted rock that erupts from a volcano.										
Ring of Fire	Is a volcanic chain surrounding the Pacific Ocean.										
Seismic waves	waves of energy that travel through the Earth's layers, and are a result of earthquakes and volcanic eruptions.
